3. Overview of the MOL group

The term "the Company" in the consolidated financial statements refers to the parent company (Mitsui O.S.K. Lines, Ltd. –MOL-) and its 286 consolidated subsidiaries as well as 37 affiliated companies accounted for by the equity method. The grand total of consolidated subsidiaries and affiliates accounted for by the equity method is 323.

The Company operates a worldwide network of shipping-related businesses. Consolidated business results are categorized into five segments, with overseas shipping as the key business, as well as ferry/domestic shipping, shipping agent and harbor/terminal operation, cargo forwarding and warehousing, and other businesses. MOL's businesses, along with its subsidiaries and affiliates, are shown below, in the same classifications as in the segment information.

[Overseas Shipping]

Consolidated subsidiaries & affiliates accounted for by the equity method: 223 companies

The Company operates worldwide shipping services with containerships, bulk carriers, specialized carriers, liquefied gas carriers, and oil tankers to earn revenue from ocean freights, charter hires, and vessel operation commissions. Subsidiaries and affiliates in this segment are separated into three sub-categories: ship operating companies directly involved in cargo transportation using owned or chartered vessels to earn ocean freights as revenue; companies which own vessels and charter out their vessels to ship operating companies in the MOL Group; and ship management companies which provide manning, ship maintenance, and other ship management services.

Major subsidiaries engaged in the first sub-category, ship operating companies, are Mitsui O.S.K. Kinkai, Ltd. and Tokyo Marine Co., Ltd., and equity method affiliates Daiichi Chuo Kisen Kaisha and Asahi Tanker Co., Ltd. Mitsui O.S.K. Kinkai was created by merging the Intra-Asia operating division of Navix Kinkai, Ltd., into M.O. Seaways, Ltd., and renaming it. Operations under the new name of Mitsui O.S.K. Kinkai, Ltd. began July 1, 2001. With this reorganization, Navix Naikou was renamed to Navix Kinkai and specializes in domestic shipping.

Major companies engaged in the second sub-category, shipowning companies, are International Energy Transport Co., Ltd., International Marine Transport Co., Ltd., and Mitsui Kinkai Kisen Co., Ltd. (all consolidated subsidiaries).

Ship management companies in the third sub-category include consolidated subsidiary M.O. Ship Management Co., Ltd.

In addition, the Company operates cruise ships through the consolidated subsidiary Mitsui O.S.K. Passenger Line, Ltd., and equity-method affiliate Nippon Charter Cruise, Ltd., which started operation in October 2001.

[Ferry/Domestic Shipping]

Consolidated subsidiaries & affiliates accounted for by the equity method: 11 companies

Through subsidiaries and affiliates, the Company operates domestic ferry transportation services and other domestic shipping services, mostly in coastal areas of Japan, and tugboat operations at the major ports in Japan.

Major consolidated subsidiaries in this segment are Shosen Mitsui Ferry Co., Ltd., The Diamond Ferry Co., Ltd., Kyushu Kyuko Ferry Co., Ltd. and Navix Naiko, Ltd. Major equity method affiliates engaged in ferry/domestic shipping operations are Meimon Taiyo Ferry Co., Ltd., etc. The Company executed additional acquisition of Kyushu Kyuko Ferry Co., Ltd's shares and made it one of MOL's consolidated subsidiaries during this fiscal year. Shosen Mitsui Ferry started operation in July 2001 following the reorganization of the MOL Group domestic ferry business. It mainly serves Kanto-Hokkaido routes. Blue Highway Line Corporation and Blue Highway Line Nishi-Nippon Corporation will cease the operation and be liquidated by the end of FY2001. Navix Naiko started in July 2001, focusing on domestic shipping operations previously handled by Navix Kinkai.

Tugboat operations are conducted by consolidated subsidiaries such as Nihon Tug-Boat Co., Ltd., and Green Kaiji Kaisha, Ltd.

[Shipping Agent and Harbor/Terminal Operation]

Consolidated subsidiaries & affiliates accounted for by the equity method: 31 companies

Shipping agent and harbor/terminal operations are conducted by subsidiaries and affiliates. Companies in this segment are separated into two sub-categories: those serving as shipping agents to handle sales of MOL Group cargo space and port operation; and those involved in harbor transportation, terminal operations, and customs clearance.

The major consolidated subsidiary involved in the shipping agent business is Mitsui O.S.K. Lines (Japan), Ltd.

The principal harbor/terminal operators in the second sub-category are International Container Terminal Co., Ltd., Shosen Koun Co., Ltd., Japan Express Co., Ltd. (Kobe), Japan Express Co., Ltd. (Yokohama), and International Container Transport Co., Ltd. (consolidated subsidiaries), and Utoc Corporation (an affiliate accounted for by the equity method).

[Cargo Forwarding and Warehousing]

Consolidated subsidiaries & affiliates accounted for by the equity method: 21 companies

MOL operations comprise cargo forwarding and warehousing through subsidiaries and affiliated companies. MOL regards such businesses as a key to providing comprehensive "total logistics" transportation service encompassing marine transportation, land transportation, and air cargo transportation. The segment is

separated into two sub-categories: companies engaged mainly in cargo forwarding utilizing multi-modal transportation and related logistics; and companies engaged in warehousing and related businesses. Major consolidated subsidiaries in the first sub-category are MOL Logistics (Japan) Co., Ltd., Kitanihon Kosan K.K., and MOL Logistics (USA) Inc. MOL Logistics (Japan) Co., Ltd., renamed as of October 1, 2001., is a part of MOL's effort to enhance its logistics service network under the MOL Logistics brand.

One of the consolidated subsidiaries in the second sub-category is MOL Logistics (Europe) B.V.

[Other Businesses]

Consolidated subsidiaries & affiliates accounted for by the equity method: 37 companies

MOL directly operates office-rental businesses. In addition, several subsidiaries and affiliates operate various businesses other than those classified in the above segments. Major subsidiaries and affiliates categorized in this segment are as follows:

- * Mitsui O.S.K. Techno-Trade, Ltd. (a consolidated subsidiary), a trading house that handles bunker oil, and ship supplies, machinery, etc.
- * Kusakabe Maritime Engineering Co., Ltd. (a consolidated subsidiary), a construction company.
- * Daibiru Corporation (an equity method affiliate), an office-rental and rent estate company.
- * M.O. Tourist Co. Ltd. (a consolidated subsidiary), travel agency, branched off from M.O. Air System, Inc. (now MOL Logistics (Japan) Co., Ltd.) in May, 2001.
- * Euromol B.V. (a consolidated subsidiary), a financing company that focuses on group finance for the MOL Group.

Others include subsidiaries and affiliates operating computer and information technology services, temporary staffing, and others. On April 1, 2001, MOL Management Service, Ltd. and Pro-Staff Service Co., Ltd. merged. Under a new name, Mitsui O.S.K. Career Support, Ltd., the company offers temporary staffing services.

4. Management Policies

(1) Basic Policies

Mitsui O.S.K. Lines, Ltd. (MOL) formulated the following MOL Group Corporate Principles in April 2001, based on three pillars — "Contribute to the growth of the world economy," "Maximize corporate value," and "Ensure safe operation and marine and global environmental protection."

MOL values its relationships with all its stakeholders, and with the support of an excellent and resilient MOL Group, aims to be a truly excellent company in the 21st century.

MOL Group Corporate Principles

- 1. As a multi-modal transport group, we will actively seize opportunities that contribute to global economic growth and development by meeting and responding to our customers' needs and to this new era.
- 2. We will strive to maximize corporate value by always being creative, continually pursuing higher operating efficiency, and promoting an open and visible management style that is guided by the highest ethical and social standards.
- 3. We will promote and protect our environment by maintaining strict, safe operation and navigation standards

(2) Basic Policies for the Distribution of Earnings

MOL considers maximizing return to its shareholders as one of its most important management objectives. While recognizing the need to strengthen the company's financial position to withstand changes in the business environment and volatility in shipping markets, as well as to retain earnings to invest in future operations, MOL's fundamental policy is to ensure stable and sustainable dividends for shareholders.

The dividend for fiscal year 2001, ending on March 31, 2002 is projected at 5 yen per share.

(3) Management Restructuring and Enhanced Corporate Governance

Recognizing the importance of transparency in management and the need to bolster competitiveness in today's global market economy, as well as the importance of raising company's value for shareholder, MOL has appointed outside directors, and introduced an executive officer assignment program. In June 2001, MOL added one outside director, bringing the total to three. Essentially, four of the company's 12 directors are from outside the company, including George Hayashi (a U.S. citizen who is the former chairman, president, and CEO of APL).

In addition, MOL established the Compliance Policies in November 2001, to create a

corporate culture that emphasizes strong ethics among all directors and employees. At the same time, the company formed the Compliance Committee chaired by the vice president in charge of administrative divisions. MOL is moving to complete and enforce a company-wide compliance system based on three policies — continually working toward the corporate vision, recognizing the company's commitments to society and stakeholders, and conducting fair and transparent corporate activities in a law-abiding spirit.

(4) Mid- and Long-Term Management Strategies

Aiming to strengthen global cost competitiveness, establish a stable dividend structure, and strengthen groupwide management, MOL has developed the "Creative and Aggressive Redesigning" action plans and established the mid-term management plans for every two to three years, setting phased goals and monitoring their achievement since 1994. Starting on April 1, 2001, aiming at the goals of "growth and expansion," MOL initiated a new three-year mid-term management plan, called Mitsui O.S.K. Lines' New Expansion Target (MOL next). While the Company continues its efforts to improve cost competitiveness and reduce its interest-bearing debts, MOL has allocated additional management resources to fields expected to enjoy future growth, including liner operations and resource and energy transport, to pursue both business scale and profits. We are also further strengthening MOL Group management by selecting core business segments and concentrating our management resources there. For example, MOL reorganized and consolidated logistics operations with MOL Logistics Japan Co., Ltd. as the core, while restructuring its ferry business in response to changes in Japan's transport system under the modal shift policy.

Our goal for March 31, 2004, the conclusion of the MOL next program, is to achieve consolidated revenue of 1 trillion yen, consolidated ordinary income of 66 billion yen, consolidated net income of 34 billion yen, consolidated ROE of 15%, consolidated ROA of 4%, consolidated equity ratio of 20%, and consolidated interest-bearing debts of 600 billion yen. These goals are based on an assumed exchange rate of 110 yen/US\$ and bunker oil prices of US\$120/MT.

(5) Future Issues

During FY2001, MOL could not achieve the first stage of MOL next profit goals due to a business environment that was much more severe than we anticipated. However, we continue our Creative and Aggressive Redesign efforts to strengthen competitiveness and reduce costs as we work toward the goals of MOL next.

MOL also recognizes that safe operation and marine/global environmental protection are critical in our business, and is aggressively addressing these issues. We have implemented a range of environmental programs, such as drawing up the MOL Group

Environmental Policy Statement. And in April 2001, we launched MOL EMS 21, our own environmental management system, to ensure a long-term environmental strategy under the theme "MOL: Bluer Oceans & Cleaner Environment." We continue to improve environmental protection activities, setting more detailed goals for every division and department as well as the company-wide environmental goals such as marine environmental protection, air pollution prevention, energy and resource conservation, and so on.

5. Business Performance

I. Overview

(1) Business environment

The world economy during fiscal year 2001, ending March 31, 2002, decelerated overall, compounded by the effects of the September 11 terrorist attacks on the United States. The U.S. and Asian economies declined, and Japan remained in a slump, with export trade declining as a result of the worldwide economic slowdown and low domestic demand, especially in the information technology sector.

As a result of this severe environment, consolidated business results for FY2001 showed revenues of 903.9 billion yen, an increase of 1.8% over the previous year, with operating income of 59.7 billion yen (a decrease of 23.6% from the previous year). Ordinary income was 37.3 billion yen (a decrease of 29.5% from the previous year). Net income totaled 10.5 billion yen (a decrease of 3.6% from the previous year).

In addition, MOL's non-consolidated results showed revenue of 693.8 billion yen (an increase of 1.6% over the previous year), with operating income of 36.2 billion yen (a decrease of 30.5% from the previous year), Ordinary income totaled 31.1 billion yen (a decrease of 39.2% from the previous year) and net income was 6.5 billion yen (a decrease of 53.9% from the previous year).

Cash flow

Cash and cash equivalents (hereinafter "funds") generated by operating activities during FY2001 totaled 85 billion yen. Although funds rose as a result of rising income before income taxes and a decrease in trade receivables, they decreased 6 billion yen (a 6.6% decrease) from the previous year due to increased payment such as corporate income tax. Funds generated by investment activities totaled 28.8 billion yen – a decrease of 18.3 billion yen (38.9%) from the previous year. This was mainly due to a large decrease in income from the sale of marketable securities. Funds used in financial activities totaled 132 billion yen (an increase of 1.6% from the previous year). This was mainly due to the Company's efforts to reduce interest-bearing debt by repaying loans. As a result, funds generated during FY2001 totaled 39.7 billion yen (a decrease of 28.1% from the previous year).

(2) Segment Results

Overseas shipping

The yen remained weak compared to the previous year, and fuel oil prices showed a slight decline. These were positive factors. However, particularly during the second half of FY2001, cargo volume declined as the world economy continued to slow down, freight rates declined in the face of more intense competition, and the charter market stagnated. These factors contributed to a severe business environment.

The Liner Division expanded and improved services, launching new large-scale, high-speed containerships in key eastbound and westbound trades and opening new routes in Asia. However, profitability declined sharply from the previous year as a result of surplus cargo space, declining freight rates, and a decrease in cargo volume. During the second half of FY2001, the Liner Division decreased the number of ships on key routes to improve supply and demand situation, and also continued its cost reduction programs.

The profitability of non-liner operations increased from the previous year. This resulted from the acquisition of new cross-trade contracts and improvements in operating efficiency. In addition, most of our specialized carriers, tankers, and liquefied natural gas (LNG) carriers sail under long-term contracts, which helps ensure stable profits.

Cruise ship operations achieved the same results as in the previous year.

Overseas shipping revenue for FY2001 totaled 744.7 billion yen (an increase of 3.3% over the previous year), with operating income of 58.6 billion yen (an decrease of 20.7% from the previous year).

Ferry/Domestic shipping

In ferry operations, Shosen Mitsui Ferry Co. started operation in July 2001. Restructuring of the MOL Group ferry business, including improving service and withdrawing from unprofitable routes, is still under way. A sharper than anticipated slowdown in cargo volume and more severe competition resulted in a decrease in profitability compared to the previous year.

FY2001 revenue totaled 32.7 billion yen (a decrease of 11.1% from the previous year) with an operating loss of 1 billion yen.

Shipping agent and harbor/terminal operations

Profitability of the container terminal business worsened due to the slowdown in cargo volume on major liner routes. The domestic logistics division faced a severe business environment, with a sluggish domestic economy and more intense competition. But its profitability nearly matched that of the previous year thanks to cost reductions and other rationalization efforts.

Revenue in this sector totaled 79.2 billion yen (a decrease of 1.4% from the previous year) and operating income came to 1.2 billion yen (a decrease of 63.7% from the previous year).

Cargo forwarding and warehousing operations

MOL continued to reduce costs in the air freight forwarding business, but its profitability worsened because of decreased as cargo volume, a result of the slowing U.S. economy and continued sluggishness in Japan.

Revenue in this sector totaled 45.1 billion yen (a decrease of 14.5% from the previous year) and operating losses came to 0.3 billion yen.

Other operations

In the temporary staffing business, the Company merged two MOL Group companies to form Mitsui O.S.K. Career Support Co., Ltd., further consolidating our management resources.

MOL enhanced its trading business operations in areas such as vessel supplies, but overall performance did not improve.

In the travel agent business, M.O. Tourist Co., Ltd. was established and contributed to improved performance in this field.

Revenue in this sector totaled 69.3 billion yen (an increase of 9.2% over the previous year) and operating income was 2.6 billion yen (a decrease of 10.2% from the previous year).

II. Outlook for FY2002

For FY2002, we expect difficult economic conditions to persist, especially in overseas shipping. However, we see signs that economic declines have bottomed out in the United States, Japan, and Asia. We will continue our efforts to improve cost competitiveness, especially in the Liner Division, and concentrate our management resources on areas where we anticipate future growth, such as energy resource transport, to ensure the continued growth of the MOL Group.

We expect the world economy to start a slow recovery in the second half of FY2002, and anticipate improving markets for bulk and specialized carriers and tankers. As a result of these positive factors, as well as our ongoing cost reduction efforts and improved profitability in ferry and cruise ship operations, we anticipate consolidated revenue of 930 billion yen, ordinary income of 30 billion yen, and net income of 15 billion yen. MOL's non-consolidated revenue is expected to reach 700 billion yen, with ordinary income of 24 billion yen and net income of 10 billion yen.

These projections are based on a presumed exchange rate of \\$130/US\\$, and bunker oil prices of US\\$145/MT.

We expect the dividend for FY2002 to be 5 yen per share, assuming we achieve our profit goals.

7. Applicable Accounting Principles in Consolidated Financial Statements

I. Accounting Principles

(1) Valuation of assets

Marketable Securities

Short-term investments: At market, cost being determined by the moving average

method

Bonds or securities to be held until

maturity:

At cost based on the depreciation method

Other securities:

(a) Marketable

At market based on the market value on March 31, 2002 (the difference in book and market values taken care of with direct capital infusion, and securities sold value calculated mainly based on the moving average method.) Mainly at cost based on the moving average method

(b) Non-marketable

Derivatives: Mainly at market.

Inventories: Mainly at cost based on the moving average method.

(2) Depreciation

Tangible fixed assets:

Vessels: In principle, the straight-line method
Buildings: In principle, the straight-line method
Other tangible fixed assets: In principle, the declining-balance method

Intangible fixed assets:

The straight-line method

(3) Accounting method for deferred assets

Amortization of bond issue expense; Bonds issue expense is charged to income as incurred.

(4) Provisions

(a) Allowance for Doubtful Receivables

Allowance for general receivables is appropriated based on past loss experience. As for some doubtful receivables, amounts for estimated losses are appropriated after examining the possibility of recovery.

(b) Provisions for Employees' Bonuses

Provisions for bonuses are provided in an amount accrued during the current period.

(c) Provisions for Employees' Retirement Benefits

The Company appropriates an amount of a provision for the period ended March 31 based on the total amount of the estimated lump-sum retirement and pension payments at the end of the fiscal year. Actuarial gains and losses are recognized in expenses using the straight-line method over the average of the estimated remaining service lives of mainly 10 years commencing with the following period.

(d) Provisions for Statutory Required Overhaul of Vessels

Provisions for statutory required vessel overhauls are provided based on the estimation of future expenditures for statutory required vessel overhaul.

(e) Provisions for Losses on Guarantees

The Company appropriates a provision for the estimated cost of losses on guarantees of liabilities at affiliated companies and other companies based on the financial condition of each company receiving such guarantees.

(f) Provision for Restructuring Expenses

The Company appropriates a provision for the estimated cost of restructuring businesses.

(5) Shipping Revenues and Related Expenses

Shipping revenues and the related voyage expenses are mainly recognized by the completed-voyage method.

(6) Accounting Method for Leases

Finance leases, except such lease transactions where ownership of leased assets is transferred from lessor to the lessee at the end of the lease term, are treated as standard rental transactions for accounting purposes.

(7) Accounting Method for Hedges

(a) Accounting method

Deferred hedging transactions are adopted for accounting method. However, interest rate swaps and interest rate caps that meet conditions for special treatment are accounted for separately.

(b) Hedging methods and instruments

<u>Methods</u> <u>Instruments hedged</u>

Foreign-currency loans Foreign-currency future transactions Foreign-currency forward agreements Foreign-currency future transactions

Foreign-currency swaps
Interest rate swaps
Commodity futures
Foreign-currency loans
Loans and bonds
Bunker oil

(c) Hedging policy

In accordance with the Company's internal regulations on managing market risk, each hedging instrument is clearly defined and then they are used only to manage risk associated with fluctuations in foreign exchange and interest rates.

(d) Method for evaluation of hedging validity

The validity of hedging is based upon a comparison of the accumulated movement of the hedgeable instruments' market or of cash flow with the accumulated movement of hedging methods market of cash flow. However, evaluation of hedging validity is omitted for interest rate swaps satisfying specific conditions.

II. Evaluation for consolidated subsidiaries' assets and liabilities

In the elimination of investments in subsidiaries, the assets and liabilities of the subsidiaries, including the portion attributable to minority shareholders, are recorded based on the fair value at the time the Company acquired control of the respective subsidiaries.

III. Amortization of the consolidation difference

Consolidation difference is amortized over 5 years, in principal. However, consolidation difference related to the former Burmah Transport Holdings Ltd., which was merged with MOL-NIC Ltd., and those related to the Bling Inc., are amortized over14 years, the period of their economic effect.

IV. Consolidated Statements of Surplus

The Company made consolidated statements of surplus for profit accounting of the consolidated companies and equity method affiliates, based on the profit accounting settled during the FY2001.

V. Scope of Funds of Interim Statements of Cash Flows

Cash and cash equivalents listed on the FY2001 statements of cash flows include cash, highly liquid deposits and other instruments that can be converted into cash at any time, and short-term investments maturing within three months that have little risk of changes in price.

VI. Other Applicable Principles in Consolidated Financial Statements

- (a) The Company adopts the "without consumption tax" accounting method, in which the Company recognizes revenue net of consumption tax.
- (b) Interest expenses of the Company and consolidated subsidiaries are recognized on the actual accounting basis, in principal. However, interest expenses accrued during construction of certain assets, such as vessels and buildings, whose construction require long period of time and significant costs, are capitalized and included in the acquisition costs of the assets. For the FY2001, such capitalized interest amount to 7 million yen.
- (c) The Company revalued the commercial real estate of the equity method affiliate Daibiru Corporation, based on the land revaluation law. As a result of this revaluation, 2,172 million yen of the amount appropriated for the Company's equity was included under shareholders' equity in the financial statements of the Company.

VII. Others

The BGT project is operated by subsidiaries that are legally independent of the Company. The assets of the BGT project are secured by parties other than the MOL Group and the subsidiaries involved in the project have their own creditors.

8. Appendix to the consolidated financial statements

[Accounting for Financial Instruments]

Effective from this fiscal year, accounting standards for financial instruments were used to set the method of evaluating available-for-sale securities. The standard was promulgated in the Business Accounting Deliberation Council's paper "Opinion Concerning the Establishment of Accounting Standards for Financial Instruments" issued on January 22, 1999.

As a result, 17,943 million yen in investment securities, 33 million yen in other long-term asset, 11,423 million yen in available-for-sale securities variance of the estimate, 23 million in deferred tax assets, 6,345 million yen in deferred tax liabilities, and 230 million yen in minority interests were recorded.
